

Mount Clemens Community Schools
Free On-line Tutoring/MEAP Preparation Service for Students in Grades K-12

Mount Clemens Community Schools is pleased to offer all students the opportunity to sign-up for on-line tutoring (free-of-charge) to help address areas of weakness in any of the core academic areas (math, English language arts, reading, science and social studies). The system will first route students through an assessment and then will provide lessons games and practice to help the student master the identified areas of weakness. Students can use the system for remediation, enrichment or advancement and can work at their own pace to achieve grade-level or above grade-level proficiency. The curriculum that students progress through is aligned to the Michigan Standards and Benchmarks as well as the more specific grade-level content expectations that the state developed. Teachers are able to log onto the internet-based system to check to see how much time students are spending on the system, what time they are accessing the system as well as benchmarks they have mastered or not yet achieved. In order to use the system, students only need access to the internet and a district-issued login and password which then permits access to tutoring and engaging educational games 24-hours a day through September 2006 (or as long as they are enrolled in any of the Mount Clemens Community Schools).

Students will be given their login/passwords in a letter that will be sent home from the school sometime during the first month of school. If you are interested in having your son/daughter begin to use this on-line tutoring service right away, please complete the following registration form and return it your child's school office.

On-line Tutoring Registration Form

Please indicate your choice below:

_____ Yes, I would like my son/daughter to use the on-line tutoring service. My child will access this service from a computer with internet access at home.

_____ Yes, I would like my son/daughter to use the on-line tutoring service. My child will access this service from a computer with internet access from the public library, friend, neighbor, relative, work or other location.

_____ Yes, I would like my son/daughter to use the on-line tutoring service, but I do not have access to a computer with internet access.
