"Today's youth have a special language that we as parents need to really learn. That is the language of ICT. For us to be able to understand them, get closer to them, building bridges between us, we really need to make some effort in learning their language.

It is a fact that today, the language of computers, internet and mobiles have become the common one. That is why we as parents need to get equipped, trying to learn the language of our children in order to be able to continue doing our role as parents in guiding and protecting them." Hala Tadros Parents Internet Safety Group
